

## System Update Required Notice

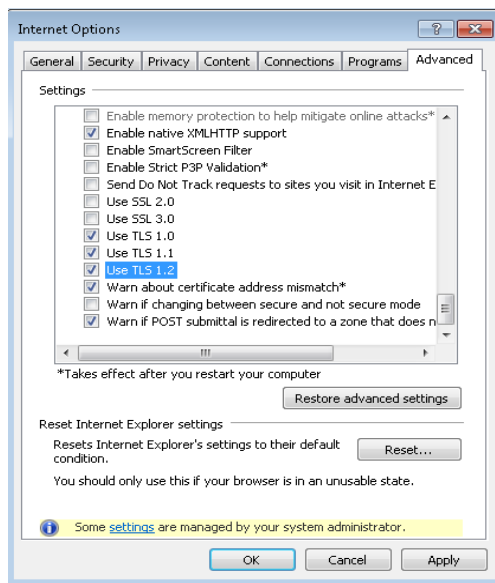

In order to perform all on-line banking related functions and transactions, the following system updates will be required:

- For Window and IE Users:

1. WindowXP, Vista, Server2003 are no longer supported, please update to Windows 7 or newer version.

2. Windows7, Windows8, Server2008: IE8 to IE 10, please go to “Internet Options”, then “Advanced” Tab, Check the box “Use TLS 1.2” Under Security.

IE11 should be enabling TLS1.2 by default. (It might manually uncheck, please confirm).

- For Google Chrome:

V29 and older versions are no longer supported, please update to V29 or newer.

- For FireFox:

1. FireFox 23 and older versions are longer supported, please update to FireFox27 or newer.

2. FireFox 24-26 require enabling TLS1.2 from the setting; updated to FireFox 27 or newer is suggested.

3. FireFox 27 and newer are enabling TLS1.2 by default. (It might manually uncheck, please confirm).

- Mac OS/Safari

OS X 10.8 and older versions are no longer supported; update to OS X 10.9 or newer is required.
